DETAILED ACTION

Allowable Subject Matter

The indicated allowability of claims 2-8 is withdrawn in view of the newly discovered references to Miser, U.S. 4,596,395. Rejections based on the newly cited reference follow.

Specification

The disclosure is objected to because of the following informalities:

The claims recite the limitations "the lip of a lower density and harder material than the sleeve", and "said sleeve is about 0.2 denser than the slip" in claims 2 and 3, and claim 6 respectively. There is insufficient antecedent basis for these limitations in the claims.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 5 is rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. A unit of measure for the density of the lip and sleeve being critical or essential to the practice of the invention is not included in the claims and is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Miser, U.S. 4,596,395.

Regarding claims 2-8, as best understood by the Examiner, Miser discloses a hollow sleeve (14), a bell shaped lip portion (S2, L), a tubular portion (S1, H) and a metal sleeve (30).
